MENSTRUAL PAIN TENS

Women's Health

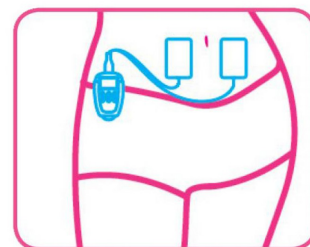

OVA+ Period Pain Reliever

The Ova+ Period Pain Reliever TENS unit offers a drug-free pain relief option from:

- Period Pain (Dysmenorrhoea)
- Endometriosis
- Fibroids
- Pelvic inflammatory disease.

The unit applies a small electric current through two electrode patches placed on the lower abdomen. This causes muscles in the uterine area to relax, leaving a calming analgesic effect. This small and convenient unit can be worn all day under clothing to provide safe, continuous, drug-free period pain relief whilst maintaining a normal, active lifestyle.

Clinically Proven – Trials carried out using the Ova+ have identified that TENS is very effective at treating period pain. TENS reduces the cramping which is caused by reduced blood flow to the muscles. Results of the trial illustrated that the Ova+ did not present any side effects, such as nausea and drowsiness, commonly associated with analgesia and other pain relief drugs.

Endometriosis Pain Relief – Treatment for endometriosis consists of non-steroidal, anti-inflammatory drugs or the oral contraceptive pill, all of which work by reducing the activity of the uterine muscle.

Waveform: Symmetrical Bi-Polar rectangular
Rechargeable Li-ion battery
Single Channel

Kit Includes:
Ova Plus Unit
Instruction Manual
Rechargeable Battery
USB Charging cable

Pisces #	Item Description	VA Price
26481T	OVA Plus Period Women's TENS	\$139.99
26483T	Ova Plus Electrodes 4 Packs x 2 pads	\$49.00

Education: Instruction manual included in package.

Contraindication: Pregnant, 6 weeks post pregnancy, Pacemaker, Implanted Defibrillator, heart rhythm problem, Epilepsy, Cervical cancer, Poor sensation of the pelvic region. Do not place electrodes on skin that does not have normal sensation; broken skin, or on the front of the neck, head, over or eyes.

PELVIC FLOOR STIMULATOR

Women's Health

iEase Biofeedback Pneumatic Pelvic Floor Exerciser

- Pneumatic Biofeedback Technology
- Two modes: Test & Train Mode
- Real-time voice alerts (mute possible)
- Large LCD screen display
- Low battery warning
- Unique sensor can work at 3 different positions (lying, sitting, standing)

Test Mode: Assesses pelvic floor muscle strength by instructing to flex pelvic floor muscle for as long as possible. Once repeated 5 times, the iEase selects the suitable strength level for Kegel exercise in the 'Train' mode. The Test mode also provides an objective measurement of how your pelvic floor muscle strength is improving.

Train Mode: Each tailor-made program operates via a unique inflatable probe. Once inserted, the iEase instructs you to inflate the probe to a comfortable level to then squeeze against the probe with your pelvic floor muscle for comfortable and effective Kegel exercises.

21R0178IR	Dilator Size 8 Length 6.5" Width 1.5"	\$34.99
21R023IR	*Dilator Handle	\$19.99

Sizing: Dilators can be purchased as a set of 8, Sets of 4 or individual based on the Veteran's needs.

Education: Latex free. Clean by hand-washing with mild soap and water. Avoid Bleach or any harsh chemicals. Use with water-based lubricant.

How to use: Wash hands and dilators with mild soap and warm water. Use a generous amount of water-based lubricant on the dilator and your vagina (or rectum). Select the dilator that you can accommodate and lay down either on your back with your knees bent or on your side with knees bent and a pillow cushioning your knees. Breathe deeply and insert on exhale. Recommended time to keep dilator inserted is 15 minutes or as instructed by your healthcare provider. Repeat this process once or twice per day, progressing to larger sizes as tolerated.

Measure widest part of breast tissue (A) to determine cup size and under breast (B) for circumferential sizing. If adding breast prosthesis, select the cup size of prosthesis. If there is residual breast tissue, measure (A) to see if it meets criteria to become a AA or A size. If remaining breast tissue is of AA or A size, select 1 size larger than breast prosthesis.

CUP Size	Measurements
AA	29½" - 30¼"
A	30¼" - 31"
B	31" - 32"
C	32" - 32¾"
D	32¾" - 33½"

DDD	34¼" - 35"

POST SURGICAL CARE

PATRICIA POST SURGICAL COMPRESSION

Women's Health

The Patricia bra is a light compression bra with zip-front closure and velcro adjusting straps, allow for ease putting it on and taking it off, even with limited mobility after a surgery. The Patricia compression bra fabric wicks moisture away; its rounded neckline is comfortable at just the right height. This compression bra is ideal after some surgeries; it can keep everything in place while still allowing easy access to a port or for follow-up appointments.

Material 92% Nylon, 8% Spandex

OPTIONAL: Breast Stabilizing Belt: (sold separately) A

compression belt keeps the operated breast in place and prevents dislocation of implants. Anatomically formed, made of a stretch, strong fabric, provides an individual fit and compression to the upper parts of the breast.

Maternity

BREAST PUMP

MEDELA HARMONY

MANUAL BREAST PUMP

Maternity

EASY AND CONVENIENT PUMPING: Harmony is a manual pump that has been designed for the occasional time when you're away from your baby. Features a soft-touch, ergonomic swivel handle for enhanced comfort

EASY TO USE: Manual controlled vacuum allows you to adjust the suction for the most optimal comfort level and efficient flow of breast milk. Once milk starts to flow, you switch to the longer side of the handle which creates a slower sucking cycle to express the majority of your milk

Unique to Medela breast pumps, this research-based and patented design allows mothers to pump more milk in less time. It resembles a baby's natural nursing rhythm for improved comfort and efficiency.

INCLUDES: (1) Harmony breast pump, (1) PersonalFit 24mm breast shield, (2) 5 oz/150 ml breast milk bottles with lid, bottle stand, (1) valve and (2) membranes, instructions for use, and a breastfeeding information guide

BREAST PUMP

MEDELA SYMPHONY

DOUBLE ELECTRIC PUMP

Symphony is Medela's latest innovation in hospital-grade electric double pumps. With breakthrough 2-Phase Expression pumping, Symphony is proven to reduce pumping time through faster let-down and milk flow and remove as much milk as a breastfeeding baby.

Features & Benefits

- 2-Phase Expression® technology: Designed to mimic a baby's natural nursing rhythm.
- Convenient: Single or double pumping.
- Two separate, independent

membrane units: Allows switching between single and double pumping by simply applying or removing the second collection kit to the breast

- Let-down button: Moms can easily return to stimulation by pressing the let-down button
- Initiate and maintain milk supply: If direct breastfeeding is not possible, as well as collect breast milk at work or during other absences from the baby.
- Hospital grade (multi-user): The pump's kit is separate from the pumping mechanism and protected from overflow by a specially designed membrane

General

- Color: yellow
- Vacuum: 50-250 mmHg
- Includes electric pump only

Fetal Heart Beat Doppler

The baby heartbeat tracker with 3MHz probe employs the latest technology in baby heart sound listening. The backlit LCD screen displays the fetal heart rate, and an audible sound is heard in real-time from the high quality speaker. Has 3 built in modes that allows the user to view the heart rate in 3 modes. Suitable for use after the 12th week of pregnancy. Included: Heartbeat doppler, doppler probe, ultrasound gel, 2xAA batteries, user manual.
